AEGIS SERIES
FOR LG G2X™

TRIDENT CASE™

PROTECTION OF A HIGHER POWER

The Aegis for the G2x by LG offers full protection while minimizing the added bulk. The case features a silicone lining for impact insulation with removable plugs over the audio and power ports to keep out debris and moisture while the durable polycarbonate shell holds the case together with a rubberized, soft-touch finish.

KEY FEATURES

DISTINCTIVE CONSTRUCTION

Unlike Trident Case's other series of cases, with the Aegis, the silicone layer is on the inside — in direct contact with the G2x — with a hard polycarbonate shell on the outside.

DROP PROTECTION SYSTEM

The four corners of double-thick silicone insulate the G2x from everything including light bumps to violent drops with a unique shock-absorbing design.

ANTI-SKID DESIGN

The exposed portions of silicone not only insulate the G2x from drops, but also act as high-friction, anti-skid pads — working when the case is face-up or face-down.

5 Case Colors Available

mySkins™

CUSTOMIZE YOUR DEVICE

Mix and match different colored skins and cases to represent your school, favorite team or just give it a personal flair.

More than 50 different color combinations per case.

mySkins™ options available at www.TridentCase.com.
